Summary

Senior Full Stack Engineer with 10+ years of experience designing and building scalable web, mobile, and enterprise applications. Specialized in NodeJS, NestJS, TypeScript, Flutter, React, and cloud-native architectures, with proven success delivering high-performance APIs, cross-platform applications, and secure distributed systems. Experience in leading end-to-end product development from architecture and backend services to frontend delivery, CI/CD, and cloud deployment. Passionate about clean architecture, developer autonomy, and building maintainable software that scales.

Work Experience

Senior Full Stack Engineer (Contract)

CONTINENTAL GENERAL INSURANCE

November 2025 - April 2026

- Developed enterprise-grade features for insurance platforms using TypeScript, React, Node.js, and AWS cloud services, supporting secure and scalable business applications.
- Worked with infrastructure-as-code, AWS CDK, CI/CD pipelines, and cloud-native deployments, enabling reliable delivery across distributed environments.
- Collaborated with cross-functional engineering teams, product stakeholders, and QA to deliver backend APIs, frontend enhancements, and system integrations.
- Participated in architecture discussions, code reviews, and technical design sessions to support long-term maintainability, scalability, and engineer best practices.

Senior Backend Developer

ROBERT WALTERS

April 2024 - October 2025

- Architected and optimized backend services using NestJS, TypeScript, and Node.js, improving API response times by 25% and ensuring reliability for thousands of concurrent users.
- Executed the full lifecycle development of CRM features, integrating WebSockets for real-time data updates and streamlining client management workflows.
- Developed high-performing integrations by collaborating with front-end teams, utilizing React and Redux to reduce cross-team turn around time by 15%.
- Troubleshoot and resolve critical infrastructure issues while managing CI/CD pipelines on AWS to ensure secure, rapid-deployment cycles with zero major incidents.

Teaching Partner

UPLIFT CODE CAMP

November 2021 - October 2025

- Mentored and coached over 100 aspiring developers in Node.js, TypeScript, and React, achieving a high placement rate in senior-level engineering and QA roles.
- Designed workshops focusing on React, Node.js, RESTful API architecture, and modern web development practices within simulated production environments.
- Executed training modules on industry best practices, including version control workflows and Agile methodologies, preparing graduates for high-growth technical teams.
- Collaborated with fellow instructors and leadership teams to architect and continuously improve the full-stack development curriculum, ensuring alignment with modern engineering practices and industry expectations.

Senior Full Stack Developer

BRXIO

July 2023 - March 2024

- Designed a Document Management System (DMS) processing large datasets, utilizing Node.js, and PostgreSQL to improve operational efficiency by 30%.
- Developed custom rewards mechanisms integrated into enterprise systems, translating complex business requirements into high-quality, reliable code.
- Executed the end-to-end development lifecycle, from initial technical design to production deployment, ensuring strict adherence to performance and security standards.
- Troubleshoot and implement robust data validation workflows to enhance systems reliability and minimize processing errors in high-volume environments.

Senior PHP Developer

FLEXISOURCE IT

November 2020 - July 2023

- Developed and integrated enterprise card solutions for clients like Apple and Mastercard, ensuring secure RESTful API transactions and global compliance.
- Architected an AI-powered Application Tracking System using Node.js and Vue, automating workflows and reducing screening time by 40% through scalable backend design.
- Executed project milestones as lead for cross-functional teams, managing the transitions of services to AWS and maintaining consistent on-time delivery.
- Troubleshoot backend scalability issues, optimizing system fault tolerance to handle high-volume concurrent transactions with minimal downtime.

Senior Full Stack Developer

LIVEWELL CORPORATION SOLUTIONS, INC.

July 2018 - November 2020

- Troubleshoot and refactored legacy code to boost system performance by 90% through database query optimization and advanced caching on Azure.
- Architect and deployed secure RESTful APIs to enable seamless integrations with cross-platform mobile applications, ensuring data reliability across layers.
- Developed and modernized the frontend using Vue and React components, reducing UI development time by 30% for high-growth healthcare applications.
- Mentor junior developers through code reviews and workshops, ensuring technical excellence and adherence to high-quality software standards.

Server Manager

GMST INC.

August 2015 - July 2018

- Designed and developed RESTful APIs and cross-platform mobile applications using Laravel, Ionic, and hybrid mobile technologies for enterprise clients.
- Delivered real-time mobile-to-server synchronization and backend integrations to support field operations and business-critical workflows.
- Managed Linux servers, deployment pipelines, infrastructure monitoring, and production environments achieving 99.9% system update.
- Implemented automated backup, monitoring, and security protocols to improve operational resilience, incident response, and long-term system stability.

Education

Bachelor of Arts in Theatre Arts

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES

2008 - 2011

Additional Skills

Technical Skills: Node.js, TypeScript, React, Redux, GraphQL, WebSockets, JavaScript, PHP, Laravel, Symfony, NestJS, Express, Flutter, Ionic, Tailwind,

Tools & Platforms: AWS (EC2, S3, CloudFront, ECS, EKS, CDK, Lambda), Docker, Kubernetes, Terraform, PostgreSQL, MySQL, MariaDB, MongoDB, Redis, Firebase, Supabase, Digital Ocean, Azure, GCP, Jira, ClickUp, Figma, Nginx, Apache.

Methodologies: CI/CD, RESTful APIs, Agile, Scrum, System Architecture, DevOps, Project Management, Version Control, Git, SVN.

Community & Speaking Engagements

- Speaker, Laravel Workshop - LaREVEAL: Unleashing the Power of Laravel
- Speaker, Intro to Laravel - University of the East, Philippines
- Speaker, Microsoft Office & Troubleshooting - Department of Education of Malabon
- Community Representative, Laravel Philippines
- Co-organizer, Digital Ocean Manila
