Summary

Accomplished Senior Fullstack Engineer with over 10 years of experience in architecting and executing scalable, high-quality software solutions for enterprise-level platforms. Expert in Node.js, TypeScript, React, and Redux, with a proven track record of delivering reliable systems on AWS infrastructure. Mission-driven developer dedicated to translating complex business requirements into secure, high-performing technical implementations through CI/CD best practices and technical excellence.

Work Experience

Senior Backend Developer

April 2024 – October 2025

ROBERT WALTERS, MAKATI, NCR

- Architected and optimized backend services using NestJS, TypeScript, and Node.js, improving API response times by 25% and ensuring reliability for thousands of concurrent users.
- Executed the full lifecycle development of CRM features, integrating WebSockets for real-time data updates and streamlining client management workflows.
- Developed high-performing integrations by collaborating with front-end teams, utilizing React and Redux to reduce cross-team turnaround time by 15%.
- Troubleshoot and resolved critical infrastructure issues while managing CI/CD pipelines on AWS to ensure secure, rapid-deployment cycles with zero major incidents.

Teaching Partner

November 2021 – October 2025

UPLIFT CODE CAMP, MAKATI, NCR

- Mentor and coached over 100 aspiring developers in Node.js, TypeScript, and React, achieving a high placement rate in senior-level engineering and QA roles.
- Designed workshops focusing on React, Node.js, RESTful API architecture, and modern web development practices within simulated production environments.
- Executed training modules on industry best practices, including version control workflows and Agile methodologies, preparing graduates for high-growth technical teams.
- Architected curriculum updates to include modern containerization concepts using Kubernetes and infrastructure management to align with current industry demands.

Senior Full Stack Developer

July 2023 – March 2024

BRIXIO, MAKATI, NCR

- Architected a Document Management System (DMS) processing large datasets, utilizing Node.js and PostgreSQL to improve operational efficiency by 30%.
- Developed custom rewards mechanisms integrated into enterprise systems, translating complex business requirements into high-quality, reliable code.
- Executed the end-to-end development lifecycle, from initial technical design to production deployment, ensuring strict adherence to performance and security standards.

- Troubleshoot and implemented robust data validation workflows to enhance system reliability and minimize processing errors in high-volume environments.

Senior PHP Developer

November 2020 – July 2023

FLEXISOURCE IT, MAKATI, NCR

- Developed and integrated enterprise card solutions for clients like Apple and Mastercard, ensuring secure RESTful API transactions and global compliance.
- Architected an AI-powered Application Tracking System using Node.js and Vue, automating workflows and reducing screening time by 40% through scalable backend design.
- Executed project milestones as lead for cross-functional teams, managing the transition of services to AWS and maintaining consistent on-time delivery.
- Troubleshoot backend scalability issues, optimizing system fault tolerance to handle high-volume concurrent transactions with minimal downtime.

Senior Full Stack Developer

July 2018 – November 2020

LIVEWELL CORPORATION SOLUTIONS, INC., MAKATI, NCR

- Troubleshoot and refactored legacy code to boost system performance by 90% through database query optimization and advanced caching on AWS.
- Architected and deployed secure RESTful APIs to enable seamless integration with cross-platform mobile applications, ensuring data reliability across layers.
- Developed and modernized the frontend using Vue and React components, reducing UI development time by 30% for high-growth healthcare applications.
- Mentor junior developers through code reviews and workshops, ensuring technical excellence and adherence to high-quality software standards.

Server Manager

August 2015 – July 2018

GMST INC, QUEZON CITY, NCR

- Architected RESTful APIs and cross-platform mobile applications using Ionic and Laravel, facilitating real-time data access for enterprise clients.
- Executed Linux server management and infrastructure orchestration with Terraform principles, achieving 99.9% uptime and reducing incidents by 50%.
- Developed automated backup and monitoring protocols, integrating security measures to support rapid scaling of technical operations.

Education

Bachelor of Arts in Theatre Arts

January 2008 – January 2011

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES

Additional Skills

Technical Skills: Node.js, TypeScript, React, Redux, GraphQL, WebSockets, JavaScript, PHP, Laravel, NestJS, Express, Flutter, Ionic, CSS, Tailwindcss, Sass

Tools & Platforms: AWS (EC2, S3, CloudFront, ECS), Kubernetes, Terraform, PostgreSQL, MySQL, MariaDB, MongoDB, Redis, Firebase, Supabase, DigitalOcean, Azure, GCP, Git, Jira, ClickUp, Figma, Nginx, Apache

Methodologies: CI/CD, RESTful APIs, Agile/Scrum, System Architecture, DevOps, Project Management, Version Control

Community & Speaking Engagements

- Speaker, Laravel Workshop - LaREVEAL: Unleashing the Power of Laravel
- Speaker, Intro to Laravel - University of the East, Philippines
- Speaker, Microsoft Office & Troubleshooting - Department of Education of Malabon
- Community Representative, Laravel Philippines
- Co-organizer, Digital Ocean Manila
